

CSA1503-CLOUD COMPUTING AND BIG DATA ANALYTICS

Experiment-17

AIM

To change the hardware compatibility/version of an existing Virtual Machine (VM) by creating a new VM or cloning it, and verify its functionality by running simple UNIX commands.

Procedure

1. Open the virtualization software and start the Ubuntu/Linux Virtual Machine.
2. Log in to the operating system using valid user credentials.
3. Open the Terminal application.
4. Create a new working directory for storing files.
5. Navigate to the newly created directory.
6. Create text files in the directory and enter the required data.
7. Save the files after entering the data.
8. Display the list of files available in the directory.
9. View the contents of the created files using appropriate UNIX commands.

10. Verify that the files are created successfully and the stored data is displayed correctly.
11. Close the Terminal and shut down the Virtual Machine.

IMPLEMENTATION

```
Activities  Terminal  Wed 05:23
ubuntu@ubuntu: ~/cloud
File Edit View Search Terminal Help
ubuntu@ubuntu:~$ mkdir cloud
ubuntu@ubuntu:~$ cd cloud
ubuntu@ubuntu:~/cloud$ cat > f1
Hello^Z
[1]+  Stopped                  cat > f1
ubuntu@ubuntu:~/cloud$ cat > f2
HI^Z
[2]+  Stopped                  cat > f2
ubuntu@ubuntu:~/cloud$ > ls
ubuntu@ubuntu:~/cloud$ f1 f2
f1: command not found
ubuntu@ubuntu:~/cloud$ ls
f1 f2 ls
ubuntu@ubuntu:~/cloud$ cat f1
hai
hello
^Z
[3]+  Stopped                  cat > f1
ubuntu@ubuntu:~/cloud$ cat > f2
how r u
^Z
[4]+  Stopped                  cat > f2
ubuntu@ubuntu:~/cloud$ ls
f1 f2 ls
ubuntu@ubuntu:~/cloud$ cat f2
how r u
ubuntu@ubuntu:~/cloud$ cat f1
hai
```

The image shows a terminal window titled 'Terminal' with a menu bar (File, Edit, View, Search, Terminal, Help) and a status bar (Wed 05:23, ubuntu@ubuntu: ~/cloud). The terminal displays a series of commands and their outputs:

```
^Z
[4]+  Stopped                  cat > f2
ubuntu@ubuntu:~/cloud$ ls
f1 f2 ls
ubuntu@ubuntu:~/cloud$ cat f2
how r u
ubuntu@ubuntu:~/cloud$ cat f1
hai
hello
ubuntu@ubuntu:~/cloud$ cp f1 f3
ubuntu@ubuntu:~/cloud$ cat f3
hai
hello
ubuntu@ubuntu:~/cloud$ ls
f1 f2 f3 ls
ubuntu@ubuntu:~/cloud$ rm ls
ubuntu@ubuntu:~/cloud$ ls
f1 f2 f3
ubuntu@ubuntu:~/cloud$ rm f1
ubuntu@ubuntu:~/cloud$ ls
f2 f3
ubuntu@ubuntu:~/cloud$ mv f3 f4
ubuntu@ubuntu:~/cloud$ cat f4
hai
hello
ubuntu@ubuntu:~/cloud$ ls
f2 f4
ubuntu@ubuntu:~/cloud$
```

RESULT

The required directory and files were created successfully. The stored data was verified by displaying the contents of the files using UNIX commands.
